FOR IMMEDIATE RELEASE:

Mount Mercy College chooses X-Wires for student internet management and pandemic flu recovery requirements.

X-Wires, a division of Dynamic Broadband, Inc. has been chosen by Mount Mercy College to manage and provide internet services to its students. X-Wires will provide dedicated internet connections to each user, management of those connections and 24x7 phone support to residence hall users.

In addition, Dynamic Broadband will be providing a licensed wireless link to fulfill Mount Mercy's pandemic flu recovery requirements.

Mike Brown, President/CEO of Dynamic Broadband stated, "Working with outside partners to outsource the residence network shows a change in thinking for colleges. We've already seen an outsourcing trend with food, long distance telephone and other services. Residence networks are the next logical choice. Financially, it makes sense to colleges because it fixes the per student cost for internet as the college grows."

Mount Mercy also contracted with Dynamic Broadband to provide an internet link to the college for use in their pandemic flu recovery plan

"We are confident that the comprehensive services and top-notch support provided by X-Wires will be beneficial for the Mount Mercy campus community," says Barbara Parks Pooley, vice president for finance and business operations. "Mount Mercy looks forward to partnering with X-Wires as our institution continues to provide student-focused baccalaureate and graduate education in the spirit of our founders, the Sisters of Mercy."

Following its merger with Dynamic Broadband in May 2007, X-Wires has transitioned to focus on providing internet services and management to complex multi-dwelling units like Colleges, Apartment Complexes, Hotels and Senior Living Campuses. Individuals interested in more information on X-Wires services can call 1-800-WOW-DYBB (1-800-969-3922).

About Mount Mercy College

Mount Mercy College is a vibrant co-educational Catholic institution offering baccalaureate and graduate education to more than 1,500 enrolled students. Mount Mercy uniquely blends liberal arts education with professional preparation, and encourages its students to strive for excellence through service to the common good, strategic communication, reflective judgment, and purposeful living. Founded by the Sisters of Mercy in 1928, Mount Mercy is distinguished by graduates committed to service, both in their choice of career and/or personal volunteer service to the community.
